13:00 – 14:00	Lunch
14:00 – 15:30	Tracks
	Group A: Future Proofing Your Business (SASI)
	Thousands of individual shipments are replacing consolidations. Promises of anything anywhere in the world with 72 hours are becoming the norm by e-Commerce platforms larger than traditional freight forwarders. Collaborative partnerships are replacing vendor-customer relationships. Preparing leaders of the worldwide air logistics system requires new approaches to education and professional development and a thorough understanding of the implications and benefits to the traditional air cargo supply chain and your role in it going forward.
	Learn about the highly acclaimed eight-year old (constantly updated) Air Cargo Professional Advancement program by SASI to hundreds of participants around the world. This is the first aviation-related program accredited by the Chartered Institute of Logistics and Transport (CILT) UK in meeting its quality benchmark. Backed up by on-going research of supply chain developments

and employing innovative methods, this program is geared to preparing leaders for the new challenges and opportunities for all members of the worldwide air logistics industry

Group B: IATA FACE Programme

Together with the air cargo industry, IATA recognizes that there is an urgent need to invest in people, promote gender diversity, and engage young talent. Since 2013, the IATA Future Air Cargo Executives (FACE) Program aims at attracting, retaining and developing a bright pool of individuals under 36 to prepare them to become the next generation of leaders in the cargo industry. The FACE program is now evolving to adapt to the industry need for digital transformation and innovation. This session will take the audience through the foundation of FACE, and present the program's strategy and roadmap
